Turning raw data into clear decisions.

Digital Solution Developer · Power BI · Power Apps · Power Automate

PROFILE

Applied Computer Science graduate from Thomas More Antwerp, specializing in Power BI, data analytics, and data engineering. I transform complex datasets into actionable business insights — combining strong skills in data modeling, DAX, SQL, and Python with hands-on experience across multiple BI platforms. Background in software development means I can bridge technical and business teams effectively. Driven by curiosity and a commitment to continuous learning.

EXPERIENCE

Mar 2025
Present

Digital Solution Developer

Heylen Group

Supporting the Group with end-to-end digital data solutions. Building Power BI dashboards, Power Apps applications, and Power Automate workflows to streamline operations and surface actionable insights across the organisation.

Sep 2025
Mar 2025

IT Consultant

Visser & Van Baars

Delivered data and BI consultancy across client engagements, with a focus on Microsoft data stack implementations and reporting solutions.

Sep 2024
Jul 2025

DataViz Consultant

EpicData

Delivered data visualization solutions across clients including Galapagos and Buildwise. Ran internal training sessions on Power BI custom visuals and Grafana. Led the Tomorrowland Data Maestro internship project using Power BI, Databricks, Python, and SQL.
